BIKE RENTAL, ORGANIZED CAMINO AND SERVICES.

Bicigrino 2026 bike rental and services offer.

Bicigrino 2026 bike rental and services offer

Our bicycles are high-end models, specially selected and fitted out — the result of our extensive experience in bicycle touring and the Camino de Santiago. We have 20 years of experience in bicycle touring, and we were cycle tourists ourselves before offering this service.

We work with prestigious brands such as **CANNONDALE**, **MONDRAKER**, **FOCUS BIKES**, **HAIBIKE** and **AMFLOW**, all renowned for their reliability, innovation and performance on long-distance routes.

We aim to keep our fleet renewed with the latest e-bike releases and maximum battery capacity: we start at 750 Wh and many of our e-bikes carry 800 Wh batteries.

For the 2026 season we present a renewed fleet of conventional and electric bicycles, with special emphasis on our premium e-bikes equipped with the new Bosch Smart System Performance Line CX motors, delivering a maximum torque of 85 Nm with 750 Wh and 800 Wh batteries.

We are also introducing the exclusive AMFLOW PL Carbon (800 Wh), a latest-generation full-carbon bike — light, powerful and fitted with the revolutionary Avinox Drive system, developed for the most demanding cycle travellers.

All our bicycles are delivered fully equipped for bicycle touring, with configurations optimized for the Camino de Santiago and other major routes.

Just as important as the quality of our bikes is Bicigrino's professional logistics, which guarantees on-route assistance, technical support and delivery/pick-up at affiliated accommodation or agreed points throughout Spain and Portugal.

Among other things, our rental bikes come equipped with:

- Rear rack.
- Waterproof panniers.
- Chain tool.
- Ergonomic grips.
- Touring tyres.
- Tool kit.
- Camino de Santiago guidebook.
- Pilgrim credential.
- Water bottle.
- Lock.
- Mobile phone bag.
- Gel saddle cover.

* Transport to any point in Spain or Portugal is included in the rental price. You can use our services on any cycle-touring route.

Receive your bike at the starting points of the main routes, for example: St. Jean Pied de Port, Roncesvalles, Pamplona, Seville, Irún, Lisbon, Porto...

Our bikes are handed over at bike shops and leave fully checked by a mechanic.

Delivery throughout Spain and Portugal (Lisbon, Porto...). Also in St. Jean Pied de Port

TRAIL SL2

2026 RATES

cannondale®

FEATURES

This bicycle has been specially chosen for bicycle touring. Aluminium frame and a great balance across all its components.

Reliability and efficiency throughout, for optimal long-distance use.

Aluminium frame ready for fitting a rear rack and panniers.

Single chainring and 12-speed rear cassette — the perfect combination to guarantee reliability and simplicity.

Fork: RockShox Judy Gold RL with 100 mm of travel.

Brakes: Shimano MT400 hydraulic disc brakes, with 180 mm front / 160 mm rear rotors.

As a hardtail mountain bike with a good frame and quality equipment, it is ideal for fairly demanding mixed routes (trails, tracks, dirt roads), or for customers who want to give it their all on a challenging ride.

***If this specific model is not available, we will provide a similar Mondraker bike with the same or better specifications than the one offered.**

* E-BIKE BOSCH MOTOR - 750 Wh

2026 RATES

FEATURES

NEW 2026 BOSCH MOTOR. 750 Wh BATTERY.

Some barriers are always waiting to be broken, and reaching 100 Nm in e-bike motors has been one of the most sought-after. With this latest update, all Bosch CX motors (code BDU 385Y) go from the current 600 W and 85 Nm of torque to 750 W and 100 Nm, with pedal assistance increasing up to 400%.

It's easy, because Prime makes everything simple. The reliability of an aluminium frame in perfect balance with the latest version of the Bosch CX motor, and equipment that inspires confidence on every ride. It may be your first e-bike, and it certainly won't be your last. Prime and Prime R with 750 Wh batteries, 120 mm RockShox forks and latest-generation ONOFF components, including the Pija dropper post on the Prime R. Choose the colour and the build; the fun is on us.

Frame: Prime 6061 Xtralite Alloy, tapered, Forward Geometry, non-removable internal battery, profiled head tube, 12x148 mm Boost rear axle, speed sensor integrated in the dropout.

Fork: RockShox Recon Gold RL Remote 29, 120 mm, Motion Control, Solo Air, profiled steerer tube, 15x110 mm Boost axle, 30 mm aluminium stanchions, 42 mm offset.

CANNONDALE MOTERRA NEO3 - 750 Wh

2026 RATES

cannondale®

FEATURES

FULL SUSPENSION. 750 Wh BATTERY.

Full-suspension, high-end bikes with maximum comfort for your cycle-touring route.

The full-suspension e-bike concept is ideal here: with electric assistance, the “bobbing” effect of full suspension does not affect performance thanks to the power of the motor.

In this case we equip our e-bikes with a rear rack and panniers. The bikes carry everything needed for a self-sufficient cycle-touring route.

- 160 mm of suspension travel. - 12 speeds. - Hydraulic brakes. - Guaranteed minimum 750 Wh battery. You might even receive a unit with 800 Wh.

From our accumulated experience with e-bikes on Camino de Santiago stages, battery range is generally more than enough for stages of 80 km or more. You will be able to tackle up to 1,600 m of accumulated climbing per stage.

*At Bicigrino, demand for this type of bike is enormous. To guarantee availability, we consider this model the quality standard of the service we offer. If this specific model is not available, we will provide a bike of the same or better quality from the brands we work with: MONDRAKER, FOCUS BIKES, HAIBIKE...

Always a full-suspension e-bike with a Bosch motor and a guaranteed minimum 750 Wh battery.

AMFLOW CARBON PL - 800 Wh

2026 RATES

FEATURES

The future is here — the latest technology at your disposal.

At Bicigrino we have always been pioneers on the Camino de Santiago and in bicycle touring.

We have long been listening to our customers' needs and to the growing demand for quality services.

Many riders look for carbon bikes — lightweight, and adding an extra touch of exclusivity and quality to their cycle-touring route.

Amflow has just landed on the market with these exclusive, lightweight e-bikes featuring the new DJI motor and super-light 800 Wh batteries.

VERY IMPORTANT: please note that these bikes are shipped without a rear rack and therefore without panniers. They are designed for people who use the luggage-transfer services available on the Camino de Santiago and simply want to pedal freely, without any load.

If you want to try a very exclusive e-bike that has revolutionized the market — a bike that feels like a conventional bicycle and is super-light — this is an excellent opportunity.

AVINOX DJI motor, 800 Wh battery, ultra-fast charging: in one hour your battery is back at full performance.

CANNONDALE TOPSTONE - GRAVEL

2026 RATES

cannondale®

FEATURES

ALUMINIUM GRAVEL BIKE, EQUIPPED WITH A REAR RACK AND PANNIERS.

We fit a rear rack, panniers and everything needed for bicycle touring.

Our experience in bicycle touring has been poured into these bikes, fitted out and specially prepared for long-distance routes.

The carbon fork adds extra comfort and flexibility.

We preferably offer models with a single front chainring, because we consider it more reliable and easier to use.

Our gravel bikes are all very high-end (the highest range before carbon). As they are rental bikes fitted with racks, we look for reliability — that is why all our gravel bikes have aluminium frames.

We work with the highest-range models from CANNONDALE and FOCUS BIKES.

We offer a quality standard: if you book one of our bikes you may receive either a Cannondale Topstone 1 or a Focus Atlas 6.8.

GUIDE AND SUPPORT CAR SERVICE.

PRICES AND CONDITIONS OF THE SERVICE.

Our support-car and organized-Camino services are designed and intended for groups of up to 10 people.

Along with the support car, which provides permanent assistance, travels a person who coordinates the trip at all times and gives the group continuous assistance throughout the route.

This service has a daily price of:

400 euros / day,

*(*Price for groups of up to 10 people. For larger groups there is a price scale with a small increase, which we will confirm when you request a quote, depending on the number of participants.)*

That price includes the complete support-car and guide service.

Accommodation for the support-car driver shall be paid by the participants or by the travel agency booking the service.

We do not create groups: we offer this service to pre-formed groups, and we also make it available to TRAVEL AGENCIES wishing to set up their own tours or holiday packages using our services.

*We can adapt this offer to larger groups as well as smaller ones. If you have a special need not covered by this offer, please contact us.

tomas@bicigrino.com

FEATURES

We are specialists in the Camino de Santiago and in bicycle touring. We have ridden every Camino route to Santiago de Compostela by bike, and we have perfect knowledge of the terrain and of the places along the way.

Our guided-Camino and support-car services are much more than a simple escort: by booking these services you will enjoy, among others, the following advantages and added services:

- Stage planning and hotel booking.
- Luggage-transfer management.
- Mechanical assistance along the route.
- Coordination of stopping points, lunches, dinners, etc.
- Specialized guide and permanent assistance.
- Link sections included, plus excursions to special, emblematic places on each route.
- Replacement bike included, so you never have to stop, whatever happens...
